

Command Course in Agile Project Management

One-day Seminar • 12 PDUs • Concentrated-value Learning

Have you been questioned recently about the Agile or Scrum project management? ... Are you looking for a way to handle projects with dynamic, changing scopes but fixed dates and costs? ... Has the launch of PMI's new Agile Community-of-Practice (COP) piqued your interest? In this powerful seminar you will learn how Agile has become entrenched at companies like Qualcomm and the European giant Tele Atlas!

Agile Project Management is a skill set that is rapidly growing into high demand among employers. The most respected and best recognized Agile certification is the "ScrumMaster" from the Scrum Alliance, Inc. The Scrum Alliance has created a standard body of Scrum knowledge (equivalent to a PMBOK). And PMI has responded by launching its first new COP in many years, even coining the new term "Agilists" to describe practitioners of this discipline.

During this seminar participants experience highly interactive, hands-on training in how to apply Scrum in many project situations. Exercises, case studies, and examples provide mastery through an "immersion" experience. After successfully completing this class, participants will be well equipped to manage projects using Agile best practices and have the tool kit necessary to lead its adoption at work.

This 1-day class is suitable for anyone using or wanting to use Agile methods. This program is for people who are familiar with basic Agile concepts but students are not required to be PMPs.

WHAT OTHER'S ARE SAYING

"I enjoyed the exercises because they helped me understand how to apply the skills!" - Lynn M. (Valley Baptist Hospital, Texas)

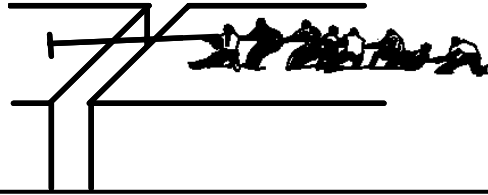

"The best part was the reality of the exercises that can be taken and applied to my teams." - Ron S. (Test Engineers, Inc., California)

"The amount of information shared and learned in such a short time was amazing!" - Randy P. (Dow Chemical, New Jersey)

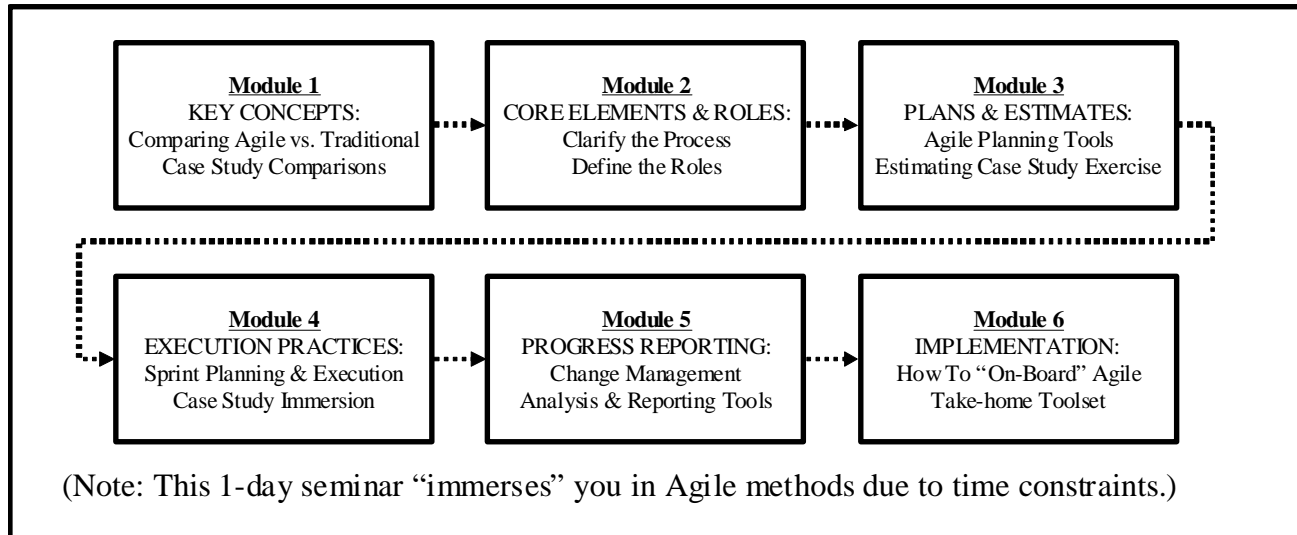

"For once – a powerful, practical seminar that was not boring! We actually had fun, which improved my learning, because the delivery pace kept everyone engaged and participating." - Monica J. (Blue Cross/Blue Shield, New York)

SEMINAR PDUs

This program is designed for people who are familiar with basic project management concepts but students are not required to be PMPs. PMPs receive **12 PDUs** if they complete the 5-hour homework assignment before the seminar begins. To obtain a certificate of completion, all students must attend a minimum of 7 class hours and participate in all class activities.
