

## Project Management Boot Camp

*One-day Seminar • 12 PDUs • Concentrated-value Learning*

Do you want to unlock the mysteries of project management? ...accurately estimate “unknowns”? ...get the right resources? In this PM Boot Camp seminar you will learn the robust project planning system enshrined in the Intel<sup>®</sup> “Make A Project Plan (MAPP) Day” process and in Siemens<sup>®</sup> Project Acceleration by Coaching and Teamwork (PACT) methodology. The system is based on Team-based Planning Technology that applies a unique methodology combining waterfall and agile techniques. The outcome is best described as an “agile waterfall”. It is part of why both Intel and Siemens’ deliver results that have been the envy of world for many years!

This unique training experience gives you a solid understanding of Team-based Planning Technology as well as the experience of comprehensive labs to practice its application! Concise and to the point, this course creates a learning environment designed for interactive, concrete growth. You will also meet colleagues facing similar challenges, share ideas, participate in exercises, and see how Team-based Planning Technology can meet your needs. Upon completion you will be ready to return to your job and take action!

### WHAT OTHER’S ARE SAYING

“The course was well conceived and presented at the right level. In practicality to my job, it was the ‘best ever’!” - Roland H (Axiom Systems, Maryland)

“The course was very interactive, which increased my ability to retain the information. The ‘small group’ activities made it one of the best classes I have ever taken!” - Nicole L (Purdue Pharma, Connecticut)

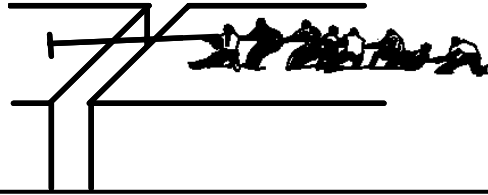

“The course leader’s clarity and knowledge of Project Management were the best ever!!” - Carlos S (Dinformatica, Mexico)

“The best part was the exchange of information... the logical network charts... in fact, all the exercises were very good indeed!” - David S (University of Cambridge - M.I.S. Division, U.K.)

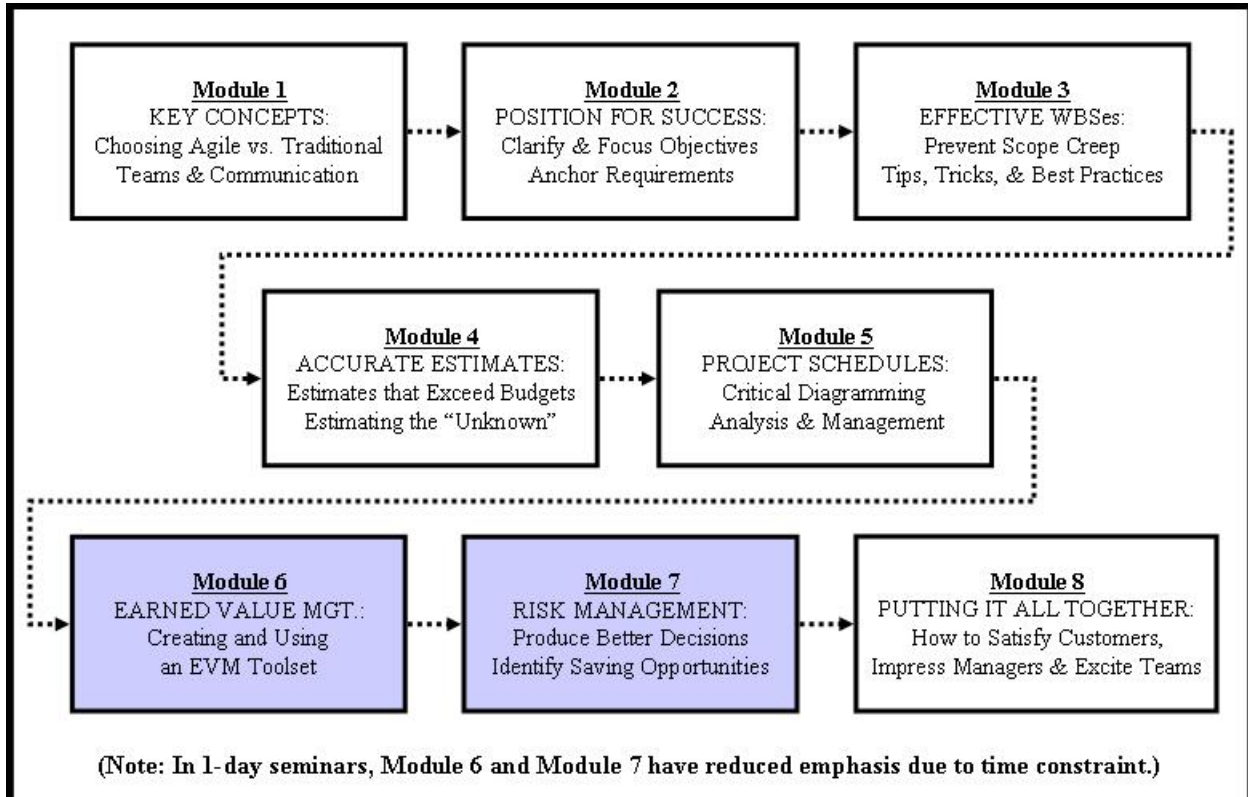

“I am very involved in multiple projects, multiple clients. I took a week long university course and I honestly feel I acquired more pertinent information in this one day... especially the PERT kernel as a mechanism to provide a scientific basis to justifying project schedules to management. I was very impressed!” - Tim C (U.S. General Services Administration, California)

### SEMINAR PDUs

This program is designed for people who are familiar with basic project management concepts but students are not required to be PMPs. PMPs receive **12 PDUs** if they complete the 5-hour homework assignment before the seminar begins. To obtain a certificate of completion, all students must attend a minimum of 7 class hours and participate in all class activities.

## COURSE OUTLINE

**Be forewarned.** This course is a one-day 4-shot Venti cup of career acceleration, so plan on an exhausting workout! Liftoff means going from zero to escape velocity in minutes. So does this course. By the time you finish, you will be operating in a whole new orbit... **guaranteed!!**

### SEMINAR DATE(S)

PM Boot Camp is being taught on **Thursday, April 8<sup>th</sup>**, from 8:30 – 5:30PM. Students may also register for the Command Course in Agile Project Management seminar being taught the next day, **Friday, April 9<sup>th</sup>** from 8:30 – 5:30PM. Registration closes **when sold out**, so... **HURRY!!**

### SEMINAR FEE

PM Boot Camp **Early Bird** registration fee is **only \$349 for PMI-Central Virginia Members**. Members can add the Command Course in Agile Project Management and get both days for **only \$599**.

**LOCATION:** Richmond, VA, hotel information will be provided to enrolled students.

**SEMINAR MATERIALS:** All students will receive a course workbook and handouts. Homework will be provided to all students, and PMPs can complete it for the total of 12 PDUs.
